Relocation of chilled  
water pumps and chiller  
replacement

## *Project Spotlight*

# Out With the Old Chiller, In With the New Chiller

James CRAFT & Son is pleased to once again work with this great customer to replace their old chiller. This quick turnaround project required a relocation of the chilled water pumps, resulting in the demolition of more than twice the amount of piping that we replaced.

Utilizing the efficiencies of our Kris Jordan and the fabrication shop team, all the piping and pipe stands were manufactured accurately—and in advance—despite a short lead time.

After Todd Mundy, Tory Anderson and their on-site team completed the piping and set the new chiller, the finishing touches of heat trace were applied by our in-house electricians. The result was a customer well-pleased with the outcome!
